

I am sick and tired of suffering through "legislative procedures" and then having that same legislation circumvented by people/groups as SOON as it is passed into law.

If the FCC, or any other body, takes it upon themselves to undermine the do not call list and it's objectives, then more and more of us will be faced with no other alternative than to take the matters into our own hands, in whatever legal way that we can.

I am a Federally Licensed citizen, and pride myself on adhering to Federal Guidelines in my field of endeavor...I would urge the FCC to take that same degree of pride in adhering to my State's Guidelines regarding "DO NOT CALL."

I select my Bank and ANY OTHER business that I choose to deal with, MYSELF, without regard to "sales pitches", and I will not tolerate ANY organization disrupting my personal life and time, with their inane, asinine attempts to sway my decisions or sell their products.

Your cooperation in this regard would be immeasurably appreciated!
